Created by women-led production studio MikeTeeVee, Shores of Loci transports players to other dimensions to create visions larger than life. Giants and Villagers need help reclaiming their lands and rebuilding their homes. Through immersive graphics that harness the power of VR, players complete the journey creating a universe where puzzled pieces are assembled and transformed.

Shores of Loci is a single-player game offering peaceful exploration without combat or enemies. The game is made up of 5 distinct, magical environments, 12 compelling puzzles, and a cast of lovable and memorable characters. Through 2.5-5 hours of intuitive gameplay, players solve beautifully crafted 3D puzzles, balanced pacing with difficulty progression. Featuring

tranquil music and serene sound effects designed for spatial audio, Shores of Loci calms, soothes, and clears players' minds in an immersive and meditative puzzle experience.

“Creating this first title has been one of the most enjoyable and satisfying projects I have worked on in my career. The incredible team that we put together has really put all their hearts and soul into it, and I think the result is beyond our expectations,” said Ellen Utrecht, executive producer and founder of MikeTeevee.

Developed during the pandemic and designed entirely in the Quest headset, the beautiful and vastly differing environments in Shores of Loci give players an escape from their homes into magical worlds with new elements and weather patterns. As an accessible and inclusive experience, Shores of Loci is for puzzle lovers and anyone who wants to immerse themselves in new worlds. It is playable for first-time VR users of all ages.

### **Gameplay Highlights**

### **About MikeTeeVee**

MikeTeevee, located in Los Angeles and Amsterdam, was founded in 2011 and is a female-run production company. Our award-winning team has a deep passion for entertainment and harnessing the power of emergent digital platforms to create truly unforgettable content experiences. Shores of Loci is the studio's first VR title, the culmination of decades of

storytelling craft, love, and passion, translated in an immersive and interactive world. MikeTeeVee hopes to continue developing and releasing similar puzzle games that positively impacts its players.
